INTRODUCTION

Competency Test for Medical Doctor (UKMPPD) is a test conducted at the national level in order to assess cognitive, psychomotoric and affective aspects of professional program students which includes attitude, knowledge, skills, professional ethics and scientific discipline. Given the importance of this exam, the students are expected to prepare well. The learning innovations performed by Medical Faculty of UMI is to conduct intensive guidance called the UKMPPD Preparation Block before the implementation of UKMPPD Try Out (TO). Followed by a Doctor Education Program Students (MPPD) who has completed Clinical phase at Level 2. Materials and questions are given based on Indonesian Doctor Competency Standard (SKOI).

METHOD

UKMPPD Preparation Block held for four weeks before the implementation of TO, followed by a Doctor Education Program Students (MPPD) who has completed Clinical phase at Level 2. There are about 82 students consisting of 53 first taker and 29 retaker. They were given material guidance and practice questions based on Indonesian Doctor Competency Standard (SKOI) in the form of vignette and multiple choice. Recapitulation of attendance is calculated based on the material and result of finger print data recapitulation. Then tested analytically to assess the relationship of counseling presence with UKMPPD TO score.

CONCLUSION

UKMPPD Preparation Block can help Student of Doctor Profesional Program to face Student Competence Test of Doctor Profesional Program.
